DENATURED SPIRIT RULES OF THE C & M STATION, BANGALORE.

1/A

Whereas it has been found necessary to take steps to control the importation, possession and sale of denatured spirits in the Civil and Military Station of Bangalore, in exercise of the powers conferred by Section 62 of the Excise Regulation, 1915(I of 1915), as applied to the Station, the Hon'ble the Resident in Mysore is pleased to make the following rules under Sections 9 to 11, 13 and 16 to 18 of the said Regulation. They will come into force on 1st January 1933.

1. Definition. "Denatured Spirit" means spirit subjected to a process prescribed by the Local Government by notification for the purpose of rendering unfit for human consumption. The process prescribed for ordinary denatured spirit in the Civil and Military Station of Bangalore is the admixture with spirit of at least 50° O.P. of light caoutchoucine and pyridine bases in the proportion of ½ a gallon of light caoutchoucine and ½ a gallon of pyridine bases to 99 gallons of spirit. The light caoutchoucine and pyridine bases must answer the Laboratory tests prescribed in the appendix.

"Methylated Spirit" means denatured spirit rendered effectually unfit for human consumption by the admixture of crude wood naptha in the proportion of one part of crude wood naptha to nine parts of spirit. The use of crude wood naptha in a highly purified condition is not permitted.

Denaturation by other processes may be permitted by the Hon'ble the Resident in Mysore.

2. Duty. Spirit manufactured and denatured in British India and in the Mysore State shall be exempt from excise duty; all other denatured spirit is subject to a duty of 7½ % ad valorem.

3. Import. Denatured spirit may be imported by sea but samples must be submitted to the Board's Laboratory, Madras, and there certified to be fully denatured before it can be removed from the Customs House.

Denatured spirits may be imported from any province in British India with the previous permission of the Collector provided that the spirit to be imported has been fully denatured as laid down in rule 1 supra and provided also that such spirit is transported from the

rule 3 supra.

6. Licences - Retail vend. Licences in form D.S. 2 for the sale of denatured spirit may be granted by the Collector to respectable persons on their showing that they have a demand for such spirit. The licensee may sell in quantities not exceeding 50 gallons to officers of Government for Government purposes and not exceeding one gallon to private persons. Issues in excess of a gallon shall be covered by a permit in form D.S. 6 to be granted by the licensee.

7. Licences to varnish makers and others. Licences in form D.S. 3 may be granted by the Collector to varnish makers and others for the possession of denatured spirit in such quantities as the Collector may determine in consideration of their reasonable requirements for use in their business, but not for sale.

8. Licences for Railway Companies. Licences in form D.S. 4 will be issued to Railway Companies for the storage and use of denatured spirit but not for sale. Issues of denatured spirits made to other Railway Stations in excess of one gallon must be covered by a permit in form D.S. 6 to be issued by the licensee in each case.

9. Licences to Chemists and Druggists. Licences in form D.S.5 will be granted by the Collector to chemists and druggists who for special reasons require methylated spirit.

10. A licence fee shall be levied at such rate and in such manner as will be prescribed by the Hon'ble the Resident in Mysore, from time to time, on all licences except D.S. 1.

11. Limits of possession. The quantity prescribed as the limit of private possession of denatured spirits is one Imperial gallon. The limit of possession of methylated spirit is one reputed quart.

12. Permits for transport. No denatured spirit shall be transported in quantities exceeding one Imperial gallon except under a pass in form D.S. 6. Copies of permits issued by D.S. 1 and D.S. 2 licensees shall be sent to the Superintendent of Excise, Civil and Military Station, Bangalore.

13. General conditions applicable to all licences. No shop or depot for the vend or storage of denatured spirit shall be located in the same building with any shop for the sale of intoxicating liquor for consumption on the premises.

(ii) The licence must be hung up in a conspicuous place within the depot or shop.

(iii) No depot or shop shall be kept open between the hours of 9 P.M. and 6 A.M

(iv) Denatured spirit kept for sale shall be of good quality and unadulterated. Any attempt to render such spirit fit for human consumption is punishable under Section 33 (A) of the Excise Regulation I of 1915. Should any inspecting officer be of opinion that any spirit found by him on inspection is insufficiently denatured, he shall report the matter to the Collector, and may at the time of inspection remove the spirit in question or cause the receptacle to be sealed and submit a sample to the Board's Laboratory, Madras, for analysis and report If the analysis shows that it is insufficiently denatured the spirit shall at once be treated afresh or, failing this, destroyed.

(v) True accounts of transactions shall be maintained from day to day in ink in form D.S. 7 by the holders of licences other than those in form D.S.1, who shall maintain their accounts in the form appended to their licence. The accounts and permit shall be printed books which may be obtained from the Superintendent of Excise, Civil and Military Station on payment of cost price. Accounts, invoices relating to imports, the permits received and the counterfoils of permits issued shall be preserved for one year after the period covered by the licence and shall be produced when called for by any officer not below the rank of Sub Inspector of Excise.

(vi) No privilege of storage or vend shall be sold, transferred or sub-rented without the Collector's previous permission. Nor, if the Collector, so orders, shall any agent be appointed for the management of any such privilege without his previous approval.

(vii) Any licence shall be revocable by the Collector without giving compensation on giving a licensee fifteen days' notice of such revocation.

(viii) The premises for which the licence is granted shall be open to inspection by an officer of the Excise Department not below the rank of Sub Inspector, and the Superintendent of Excise shall be furnished with such information regarding the quantity of spirit used as may be required by him.

(ix) An inspection note book in form G-10, with its pages numbered consecutively shall be maintained for the use of inspecting officers and shall be handed over to the Superintendent of Excise or any other officer authorised by him to receive it on a receipt being given therefor.

(x) Every bottle, jar and cask containing denatured / methylated spirit received into or kept for storage or sale shall be conspicuously labelled or branded with the words "made and denatured / methylated in India" or "made in -- ---------- and denatured / methylated in India" or "made and denatured / methylated in " as the case may be.

(xi) Licensees shall be bound by any additional rules that may be prescribed by the Hon'ble the Resident in Mysore from time to time.

(xii) In case of breach of any of the conditions of a licence, it shall be competent to the Collector to impose a fine not exceeding Rs.100/ for every such breach or to cancel the licence forthwith. The imposition of a fine or cancellation of a licence shall not be held to prevent the licensee from being prosecuted under Excise Regulation I of 1915.

THE HON'BLE THE RESIDENT IN MYSORE.

NOTIFICATION.

No. 87, dated Bangalore, the 22nd December 1932.

Whereas it has been found necessary to take steps to control the importation, possession and sale of denatured spirits in the Civil and Military Station of Bangalore, in exercise of the powers conferred by section 62 of the Excise Regulation, 1915 (I of 1915) as applied to the Station, the Hon'ble the Resident in Mysore is pleased to make in supersession of the rules issued with the Residency notifications Nos. 21 and 86, dated the 18th February 1922 and 12th October 1926, respectively, the following rules under sections 9 to 11, 13 and 16 to 18 of the said Regulation. They will come into force on 1st January 1933.

DENATURED SPIRIT RULES OF THE CIVIL & MILITARY STATION, BANGALORE.

1. *Definition.*—"*Denatured Spirit*" means spirit subjected to a process prescribed by the Local Government by notification for the purpose of rendering it unfit for human consumption. The process prescribed for ordinary denatured spirit in the Civil and Military Station of Bangalore is the admixture with spirit of at least 50° O.P. of light caoutchoucine and pyridine bases in the proportion of $\frac{1}{2}$ a gallon of light caoutchoucine and $\frac{1}{2}$ a gallon of pyridine bases to 99 gallons of spirit. The light caoutchoucine and pyridine bases must answer the laboratory tests prescribed in the appendix.

"*Methylated Spirit*" means denatured spirit rendered effectually unfit for human consumption by the admixture of crude wood naptha in the proportion of one part of crude wood naptha to nine parts of spirit. The use of crude wood naptha in a highly purified condition is not permitted.

Denaturation by other processes may be permitted by the Hon'ble the Resident in Mysore.

2. *Duty.*—Spirit manufactured and denatured in British India and in the Mysore State shall be exempt from excise duty; all other denatured spirit is subject to a duty of 7½% ad valorem.

3. *Import.*—Denatured spirit may be imported by sea but samples must be submitted to the Board's Laboratory, Madras, and there certified to be fully denatured before it can be removed from the Customs House.

Denatured spirits may be imported from any province in British India with the previous permission of the Collector provided that the spirit to be imported has been fully denatured as laid down in rule 1 supra and provided also that such spirit is transported from the frontier to its destination under cover of a permit in form D.S. 6.

Denatured spirit may be imported from the Mysore Government Distillery in Bangalore with the previous permission of the Collector, to a Wholesale Depot in the Civil and Military Station of Bangalore, but the consignment must not be disposed of, in anyway whatsoever, until a sample of it has been analysed at the Board's Laboratory, Madras, or any other public laboratory which the Collector may select, and certified to be fully denatured.

Spirit which it is proposed to import that is not sufficiently denatured must either be denatured afresh at the expense of the importer or it must pay duty at the full tariff rate as potable spirit.

Methylated spirit may be imported only with the special sanction of the Collector of the Civil and Military Station of Bangalore.

The import of quantities within the limits of private possession is not covered by these restrictions.

4. *Export.*—Denatured spirit may be exported by holders of D.S. (1) licences to places outside of the Civil and Military Station of Bangalore under a permit in form D.S. 6 granted by the Collector of the Civil and Military Station of Bangalore. When applying for the permit the exporter shall present to the Collector a permit authorizing the import from the Collector, or other officer empowered in that behalf, of the district to which the spirit is to be exported.

5. *Licence—Wholesale vend.*—The distillers in British India who manufacture denatured spirit will be allowed to sell to holders of licences under these rules either from their distilleries direct or from depots established with the approval of the Collector, quantities not exceeding 150 gallons of denatured spirit or 20 gallons of methylated spirit at one time. The wholesale depot licence shall be in form D.S. 1 and may be given at the discretion of the Collector to distillers and to holders of D.S. 2 licences who want to sell to other holders of D.S. licences. Issues from D.S. 1 shall be covered by permits in form D.S. 6 to be granted by the licensee.

Wholesale depot licensees will be permitted to import denatured spirits from the Government Central Distillery in Bangalore up to a limit of 150 gallons each time on the condition specified in rule 3 supra.

6. *Licences—Retail vend.*— Licences in form D.S. 2 for the sale of denatured spirit may be granted by the Collector to respectable persons on their showing that they have a demand for such spirit The licensee may sell in quantities not exceeding 50 gallons to officers of Government for Government purposes and not exceeding one gallon to private persons. Issues in excess of a gallon shall be covered by a permit in form D.S. 6 to be granted by the licensee

7. *Licences to varnish makers and others.*—Licences in form D.S. 3 may be granted by the Collector to varnish makers and others for the possession of denatured spirit in such quantities as the Collector may determine in consideration of their reasonable requirements for use in their business, but not for sale.

8. *Licences for Railway Companies.*—Licences in form D.S. 4 will be issued to railway companies for the storage and use of denatured spirit but not for sale. Issues of denatured spirits made to other railway stations in excess of one gallon must be covered by a permit in form D.S. 6 to be issued by the licensee in each case.

9. *Licences to Chemists and Druggists.*—Licences in form D.S. 5 will be granted by the Collector to chemists and druggists who for special reasons required methylated spirit.

10. A licence fee shall be levied at such rate and in such manner as will be prescribed by the Hon'ble the Resident in Mysore, from time to time, on all licences except D.S. 1.

11. *Limits of possession.*—The quantity prescribed as the limit of private possession of denatured spirits is one Imperial gallon. The limit of possession of methylated spirit in one reputed quart.

12. *Permits for transport.*—No denatured spirit shall be transported in quantities exceeding one Imperial gallon except under a pass in form D.S. 6. Copies of permits issued by D.S. 1 and D.S. 2 licensees shall be sent to the Superintendent of Excise, Civil and Military Station, Bangalore.

13. *General conditions applicable to all D.S. licences.*—(i) No shop or depot for the vend or storage of denatured spirit shall be located in the same building with any shop for the sale of intoxicating liquor for consumption on the premises.

(ii) The licence must be hung up in a conspicuous place within the depot or shop.

(iii) No depot or shop shall be kept open between the hours of 9 p.m. and 6 a.m.

(iv) Denatured spirit kept for sale shall be of good quality and unadulterated. Any attempt to render such spirit fit for human consumption is punishable under section 33 (A) of the Excise Regulation I of 1915. Should any inspecting officer be of opinion that any spirit found by him on inspection is insufficiently denatured, he shall report the matter to the Collector, and may at the time of inspection remove the spirit in question or cause the receptacle to be sealed and submit a sample to the Board's Laboratory, Madras, for analysis and report. If the analysis shows that it is insufficiently denatured the spirit shall at once be treated afresh or, failing this, destroyed.

(v) True accounts of transactions shall be maintained from day to day in ink in form D.S. 7 by the holders of licences other than those in form D.S. 1, who shall maintain their accounts in the form appended to their licence. The accounts and permits shall be in printed books which may be obtained from the Superintendent of Excise, Civil and Military Station, on payment of cost price. Accounts, invoices relating to imports, the permits received and the counterfoils of permits issued shall be preserved for one year after the period covered by the licence and shall be produced when called for by any officer not below the rank of Sub-Inspector of Excise.

(vi) No privilege of storage or vend shall be sold, transferred or sub-rented without the Collector's previous permission. Nor, if the Collector, so orders, shall any agent be appointed for the management of any such privilege without his previous approval.

(vii) Any licence shall be revocable by the Collector without giving compensation on giving a licensee fifteen days' notice of such revocation.

(viii) The premises for which the licence is granted shall be open to inspection by an officer of the Excise Department not below the rank of Sub-Inspector, and the Superintendent of Excise shall be furnished with such information regarding the quantity of spirit used as may be required by him.

(ix) An inspection note-book in form G-10, with its pages numbered consecutively shall be maintained for the use of inspecting officers and shall be handed over to the Superintendent of Excise or any other officer authorised by him to receive it on a receipt being given therefor.

(x) Every bottle, jar and cask containing $\frac{\text{denatured}}{\text{methylated}}$ spirit received into or kept for storage or sale shall be conspicuously labelled or branded with the words "made and $\frac{\text{denatured}}{\text{methylated}}$ in India" or "made in ..... and $\frac{\text{denatured}}{\text{methylated}}$ in India" or "made and $\frac{\text{denatured}}{\text{methylated}}$ in ....." as the case may be.

(xi) Licensees shall be bound by any additional rules that may be prescribed by the Hon'ble the Resident in Mysore from time to time.

(xii) In case of breach of any of the conditions of a licence, it shall be competent to the Collector to impose a fine not exceeding Rs. 100 for every such breach or to cancel the licence forthwith. The imposition of a fine or cancellation of a licence shall not be held to prevent the licensee from being prosecuted under Excise Regulation I of 1915.

APPENDIX.

OFFICIAL LABORATORY TESTS TO ASCERTAIN THE SUITABILITY OF SAMPLES OF LIGHT CAOUTCHOUCINE AND PYRIDINE BASES FOR DENATURING ALCOHOL.

Specification of Light Caoutchoucine.

1. *Nature.*—By "caoutchoucine" is meant the liquid obtained by the dry distillation of vulcanised rubber. By "light caoutchoucine" is meant the liquid obtained by redistilling "caoutchoucine" and collecting that portion which passes over at or below about 200° C.

2. *The specific gravity of light caoutchoucine.*—The specific gravity of light caoutchoucine at 60 F. should lie between ·835 and ·860 referred to water as 1·000.

3. *Boiling test.*—For the purpose of this test, 100 c.c. of light caoutchoucine should be redistilled in the pyridine testing flask (see specification for pyridine bases). Under those conditions not more than 15 c.c. of distillate should pass over at or below 100° C. whilst a total (including the foregoing) of at least 70 c.c. should pass over at or below 200° C.

4. *Absence of soluble constituents.*—When 25 c.c. of light caoutchoucine are shaken with an equal volume of water in a stoppered graduated cylinder and due time is allowed for the liquids to separate again into two layers, the light caoutchoucine should show no appreciable diminution in volume.

5. *Neutrality.*—The aqueous layer obtained from test 4 should show no marked acidity or alkalinity when tested with both red and blue litmus paper.

6. *Limit of saturated hydro-carbons.*—At least 70 per cent. of the light caoutchoucine should be soluble in concentrated sulphuric acid. For testing this 25 c.c. should be measured off into a tapped and stoppered separating cylinder of suitable capacity and sulphuric acid should be added, at first with great care and in very small quantities. After each addition of acid the cylinder should be shaken and cooled to avoid loss of volatile constituents. Sufficient acid must be used (usually about 50 c.c.) for the high coloured layer to become quite fluid so that it can separate readily from the upper layer of unattacked constituents. After a final thorough shaking and cooling the cylinder should be left for about three hours to effect complete separation of the two layers and the lower layer be then tapped off. The almost colourless upper layer should be again shaken with strong sulphuric acid until it appears free from soluble constituents (as judged by the colour imparted to the sulphuric acid) and separated as before after standing. It should finally measure not more than 7 c.cs. The acid used should be of specific gravity 1·84 and may be of commercial quality.

7. *Freedom from water.*—Light caoutchoucine should not contain any appreciable amount of water. Any officer engaged in drawing samples for test should certify on the bottle that he has drawn the sample from the bottom of the containing vessel where the water, if present, will be found. For this purpose he should employ a syphon tube of which the shorter limb reaches to the floor of the containing vessel. He should also assure himself that the sample is collected in a bottle free of moisture.

Specification of Pyridine bases.

1. *Colour.*—The colour must not ordinarily be darker than that given by two c.c. of deci-normal iodine solution dissolved in one litre of distilled water.

2. *Mixibility with water.*—The pyridine bases should mix readily and completely with spirit and should give a clear or only slightly opalescent solution when mixed with twice their volume of water.

3. *Amount of water present.*—From 20 c.c. of the pyridine bases mixed with 20 c.c. of caustic soda solution (density 1·4) at least 18·5 c.c. of the bases should separate after having been repeatedly shaken together and allowed to stand.

4. *Titration.*—Dissolve 1 c.c. of pyridine bases in 9·5 c.c. of distilled water. Titrate with normal sulphuric acid until a drop of the mixture gives a definite blue spot on congo-red paper (the blue colour should at once disappear). At least 9·5 c.c. of the normal sulphuric acid should be required to produce this reaction. (To prepare the congo-red paper, dissolve one gram of congo-red in one litre of distilled water.) Soak filtered paper in this and then dry.

5. *Cadmium chloride reaction.*—Vigorously shake together with 10 c.c. of a solution of 1 c.c. of pyridine bases in 100 c.c. of distilled water with 5 c.c. of a 5 per cent. solution of dry fused cadmium chloride. A distinct crystalline precipitate should immediately result, and there should be an abundant separation of crystals within ten minutes.

5. (a) Another 10 c.c. of the above 1 per cent. aqueous solution should give a white precipitate when mixed with 5 c.c. of Nessler's reagent.

6. *Boiling point.*—Distil 100 c.c. of the pyridine bases in the manner described below. At least 50 c.c should distil over, at or under 140° C. and a total of 90 c.c. at or under 160° C.

Method.—One hundred cubic centimeters of pyridine bases are placed in a short necked copper flask of about 200 c.c. capacity. The flask is arranged on an asbestos card which has a circular hole of 30 m.m. diameter cut in it. To the flask is attached a fractionating column (consisting of a tube 30 m.m. wide and 170 m.m. long, provided with one bulb) of which the side tube (issuing 1 c.m. above the bulb) joins a Liebig's condenser of which the cooled part is at least 400 m.m. long. A standard thermometer is placed in the head of the column so that its bulb occupies the centre of the bulb of the column.

The speed of distillation is adjusted to c.c. per minute, the distillate being received in a graduated glass cylinder. At least 50 c.c. should distil ever at or under 140° C. and 90 c.c. at or under 160° C. at a barometric pressure of 760 m.m.

If the barometer varies from 760 m.m. a correction of 1° C. for each 30 m.m. of variation should be applied (e.g., under 770 m.m. of pressure 50 c.c. of distillate should come over at or under 140·3° C. whilst under 750 m.m. the same amount of distillate should come over at 139·7° C).

NOTE.—Pyridine proper is a single definite compound (C_5 H_5 N) boiling at about 160° C. Pyridine bases" are mixtures of pyridine with closely allied compounds, boiling at various temperatures. They are cheaper and more effective denaturants than the pure pyridine.

D. S. 1.

DEPOT LICENCE GRANTED TO WHOLESALE DEALERS IN DENATURED AND METHYLATED SPIRITS.

I, Collector, Civil and Military Station, Bangalore, hereby license you to establish a depot at in the Civil and Military Station of Bangalore for the wholesale vend of denatured and methylated spirits during the year ending 31st March , subject to the following conditions to be observed by you.

[For GENERAL CONDITIONS, see page 3.]

SPECIAL CONDITIONS.

The licensee shall be bound by the rules governing the preparation, possession and sale of denatured and methylated spirits as notified by the Hon'ble the Resident in Mysore from time to time.

2. The licence extends only to the wholesale vend of denatured or methylated spirit, i.e., spirit which has been rendered effectually unfit for human consumption, by the admixture of light caoutchoucine and pyridine bases or wood naptha as the case may be in accordance with the rules framed on the subject, to holders of licences in form D.S. 2, D.S. 3, D.S. 4 or D.S. 5.

3. The spirit shall be sold only in casks or jars as received from the distillery with seals intact. The quantity of spirit issued at any one time shall not be more than 150 gallons of denatured spirit or 20 gallons of methylated spirit.

4. An account of the daily transactions under this licence shall be kept in the following form :—

	In hand.		Receipts.			Total in hand and received.		Issues.				Total issued.		Balance.		
Date.	Number of casks or drums.	Quantity.	From what distillery with number and date of permit.	Number of casks or drums.	Quantity.	Number of casks or drums.	Quantity.	Name and address of purchaser.	Number of permit.	Number of casks or drums.	Quantity.	Number of casks or drums.	Quantity.	Number of casks or drums.	Quantity.	Remarks.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
		Gals.			Gals.		Gals.				Gals.		Gals.		Gals.	

5. An inspection note-book, in the prescribed form (G-10), shall be maintained for the use of inspecting officers and shall be handed over to the Superintendent of Excise or to any other officer authorised by him to receive it, on a receipt being given therefor.

Dated the day of 19

Collector.

D. S. 2.

LICENCE FOR THE SALE OF DENATURED SPIRIT.

I, Collector, Civil and Military Station of Bangalore, hereby license you to sell denatured spirit at your shop at during the year ending 31st March subject to the following conditions to be observed by you.

[For GENERAL CONDITIONS, see page 3.]

SPECIAL CONDITIONS.

1. The licensee shall be bound by the rules governing the preparation, possession and sale of denatured spirit as notified by the Hon'ble the Resident in Mysore from time to time.

2. The licence extends to the sale of denatured spirit, which means spirit which has been rendered effectually unfit for human consumption by the admixture of light caoutchoucine and pyridine bases in accordance with the rules prescribed on the subject.

3. The licensee may procure his supplies of denatured spirit either by direct importation or by purchase from the holder of a licence in form D.S. 1.

4. The quantity purchased at any one time under this licence shall not exceed gallons.

5. An inspection note-book, in the prescribed form (G-10), shall be maintained for the use of inspecting officers and shall be handed over to the Superintendent of Excise or to any other officer authorised by him to receive it, on a receipt being given therefor.

6. A licence fee at the rate of 8 annas per Imperial gallon of denatured spirit shall be levied on the quantity of denatured spirit sold to Government officers and to the public in each quarter. For this purpose, the licensee shall submit to the Collector of the Civil and Military Station of Bangalore, within a week after the close of each quarter a statement showing the stock on hand, quantity received and the quantity sold to the Government officers and to the public, and the balance of spirit for the preceding quarter. The licensee shall pay the fee levied by the Collector within fourteen days of demand into the Imperial Bank of India, Bangalore.

Dated the day of 19

Collector.

D. S. 3.

LICENCE FOR POSSESSION AND USE OF DENATURED SPIRIT BY VARNISH MAKERS AND OTHERS.

I, Collector, Civil and Military Station of Bangalore, hereby license you to possess denatured spirit at for use in the manufacture of during the year ending 31st March , subject to the following conditions to be observed by you.

[For GENERAL CONDITIONS, see page 3.]

SPECIAL CONDITIONS.

1. The licensee shall be bound by the rules governing the preparation, possession and sale of denatured spirit, as notified by the Hon'ble the Resident in Mysore from time to time.

2. The licence extends only to the possession and use of and not to the sale of denatured spirit, i.e., spirit rendered effectually unfit for human consumption by the admixture of light caoutchoucine and pyridine bases in accordance with the rules prescribed on the subject.

3. The licensee may procure his supplies of denatured spirit either by direct importation or by purchase from the holder of a licence in form D.S. 1. He shall not possess at any one time more than gallons of denatured spirit.

4. An inspection note-book, in the prescribed form (G-10), shall be maintained for the use of inspecting officers and shall be handed over to the Superintendent of Excise or to any other officer authorised by him to receive it, on a receipt being given therefor.

5. A licence fee at the rate of 8 annas per Imperial gallon of denatured spirit shall be levied on the quantity of denatured spirit actually used by the licensee in each quarter. For this purpose the licensee shall submit to the Collector of the Civil and Military Station, Bangalore, within a week after the close of each quarter a statement showing the stock on hand, quantity received and quantity actually used by the licensee and the balance of the spirit for the preceding quarter. The licensee shall pay the fee levied by the Collector within fourteen days of demand into the Imperial Bank of India, Bangalore.
